

Today, you can help keep our native species and fragile ecosystems healthy.

Many native plants call this PKOLS (Mount Douglas Park) home. Human activity can impact the health and survival of these precious inhabitants of the park. Like any living, growing plant, they cannot thrive if trampled.

By **staying on marked trails** and **keeping pets under control** at all times, we can avoid putting any additional stress on our native species and improve their chances of thriving and surviving for future generations to enjoy.

Fringecup
Tellima grandiflora

Trailing blackberry
Rubus ursinus

Vanilla leaf
Achlys triphylla

Foamflower
Tiarella trifoliata

Menzies Larkspur
Delphinium menziesii

Western trillium
Trillium ovatum

Siberian miner's lettuce
Claytonia sibirica

Giant white fawnlily
